PREFACE

This module is a project of the DepEd Schools Division of Baguio City through the Curriculum Implementation Division (CID) which is in response to the implementation of the K to 12 Curriculum.

This Learning Material is a property of the Department of Education, Schools Division of Baguio City. It aims to improve students' performance specifically the **GRADE 10 STUDENTS** and other learners.

Date of Development	September 2, 2020
Resource Location	DepEd Schools Division of Baguio City
Learning Areas	Physical Education
Grade Level	10
Learning Resources Type	Module
Language	English
Quarter/Week	Q2/ W5
Learning Competency Code	PE10PF-IIa-h-39
Learning Competency	Assess physical activities, exercises and eating habits
Performance Standard	Maintain an active lifestyle to influence the physical activity participation of the community and society

ACKNOWLEDGEMENT

The developer wishes to express his gratitude to those who help in the development of this learning material. The fulfillment of this learning material would not be possible without these people who gave their support, helping hand and cooperation:

The developer extends his fullest gratitude and appreciation to Mr. Joferino Ginumtad-Head Teacher of PCNHS and Dr. Lolita A. Manzano EPS-MAPEH for their constant support and insightful comments and suggestions in the development of the learning material.

And to all in one way or the other helped me finish this learning material. Thank you and May God be with you all.

Understanding Life Style and Weight Management

(Physical Activity and Eating Habits)

Learner's Module in PE 10

Quarter 2 • Module 5

ARTHUR S. PECAY JR

Developer

Department of Education • Cordillera Administrative Region

What I Need to Know

Nowadays, young people tend to play their gadgets instead of involving themselves in physical activities; ordered most of their needs to be delivered by different couriers instead of going out or taking a walk to buy outside their houses. On the other hand, sedentary lifestyle is quite threatening.

In this Learning Material, you will be able to learn the importance of weight management to enhance your fitness. Read and analyze the lesson and activities prepared for you. Do not leave any incomplete and undone activities.

Good luck and enjoy the lesson.

Learning Objectives:

At the end of this module, you should be able to;

- explain the concept of having healthy eating habit,
- analyze the importance of healthy eating habit, and
- design a one-month meal plan reflecting healthy eating habit.

What I Know

Good day! Before you will undergo with the several activities in this module, I want you to answer the assessment that follows to assess what you already know about the lesson. Good Luck!

Multiple choice: Encircle the letter that best corresponds to your answer in a given statement/questions.

1. How can one maintain an ideal body weight?
 - a. Follow the latest diet fads
 - b. Balance the amount of food you eat with regular physical activity
 - c. Consult s doctor about an effective diet pill that you can take
 - d. Believe in the power of your genes
2. Which of the following is not a positive outcome of personal fitness?
 - a. improved physical appearance
 - b. enhances self-esteem
 - c. hypertension
 - d. stress reduction
3. Which of the following can help you determine healthy eating habit?
 - a. eats fast to eat more
 - b. skipping your meals
 - c. eating slowly
 - d. automatic eating
4. Which of the following would not be a benefit healthy eating habit?
 - a. helps with weight management
 - b. lowers your blood pressure
 - c. listens your chance of eating more
 - d. builds self-discipline
5. Which of the following will not improve your weight loss program?
 - a. eating three times a day
 - b. skipping your breakfast time and eating more at dinner time
 - c. eat if you feels your hungry
 - d. eating the advised amount of food
6. Eating balance diet is everyone's responsibility. Which of the following is the best reason for this?
 - a. to have a healthy life style
 - b. to maintain an ideal body weight
 - c. keeps a strong muscle
 - d. making your program convenient
7. Your body composition is influenced by which of the following?
 - a. genetics
 - b. age
 - c. gender
 - d. all of the above
8. Which of the following food groups should be consumed sparingly?
 - a. fats, oils, and sweets
 - b. fruits
 - c. vegetables
 - d. milk, yogurt, and cheese
9. Your friends are overweight and they want to start their weight loss program. What strategies and advice would you give them?
 - a. Avoid automatic eating while watching the television, reading or studying.
 - b. Try "junior size" instead of "super-size", use smaller plates, bowls, cups, or glasses.
 - c. Incorporate easy and enjoyable exercises into the program to be motivated.
 - d. All of the above
10. People who lead sedentary lifestyles are often referred to as
 - a. couch potatoes
 - b. athletes
 - c. physically fit
 - d. low-health- risk people

True or False: Write the word **TRUE** if the statements are correct and **FALSE** if otherwise.

- _____ 1. Skipping your meals anytime you like is a healthy diet program to reduce your weight.
- _____ 2. A combination of rice and carbonara is a perfect diet for persons reducing their weight.
- _____ 3. Being overweight has a connection to your muscle build.
- _____ 4. Normal weight individual has a lesser chance of having heart disease.
- _____ 5. Healthy eating depends on your self-discipline.

What's In It

There are different factors that we need to consider becoming physically fit. At present many individuals are striving to become a physically fit but their problem is how and when. For this, healthy lifestyle should be given an emphasis.

To maintain healthy lifestyle, you need to observe regular exercise and balance diet.

EATING HABIT

Story Time

It's been a year when I failed to qualify myself in a competition.

Let me share a short story on what happened. One year ago, I and my boxing team were preparing for a boxing competition. We all have our individual weight category where I was the one who will represent the team for the heaviest weight. During those days, I have to reduce 1kg to qualify myself in the competition.

After two months of hard training here comes the final weigh-in, my teammates reduced their weight with almost 2kg while mine is just .1kg. I almost cried and begged my coach to talk to the official to give me an hour to reduce but my coach told me to return to school and have my class.

If I'm going to recall what our coach always tells us, "not just training but observe your diet". I do have hard training but no discipline in eating. I keep on having heavy meals and snacks and telling myself "anyway I will have hard training later".

Now, I learned a lot of what had happened. I go back to my coach and asked him again if I can join again the training and luckily my favor was granted. During the onset of the training I started with the low intensity but focuses on my diet so after a week I lose almost one kilogram. I'm very happy that time because I am so sure that I can get my desired weight before the upcoming competition and have enough time to focus on my skill training.

What is It

In this context you will learn more about Healthful Eating Habit and Eating Disorders that I am sure it will enrich your knowledge about the lesson.

5

Modifying Eating Habit

Active lifestyle will invite different behavior or habits that if when we view it seems to simple to value. However, eating and our body's response to eating are some of the most intriguing concept in health.

Eating is an intentional act. Each day people chose from available food, prepared food, decide where to eat, which rules to follow, and with whom to dine with. These make up your eating habits. Convenience is only one factor that drives food choices. Some of the factors are:

Advertising- Media might have persuaded you to eat such food.

Availability- There are no others to choose from.

Economy- They are within your means.

Emotional Comfort- They make you feel better for a while.

Habit- They are familiar you always eat them.

Personal preference- You like the way such food taste.

Positive Associations- They are eaten by people you admire, or they are just for fun.

Region/Location- They are common or favored in your locality.

Social Pressure- They are offered; you feel you cannot refuse them.

Values/ belief- They fit your religious tradition or honor your ethical beliefs.

Weight- You think they will help to control your body weight.

Nutritional value- You think are good for you.

The last two factors are highly viable to nutritional health. Similarly, the choice of where, as well as what to eat, is often based more on social considerations that on nutritional judgements. Hence, you should be more conscious of the factor that affect your own personal food choice.

Poor food choices contribute directly to obesity, heart disease, diabetes, cancer, and other health problems. Understanding the importance of food choices becomes even more critical as greater number of people rely more on convenience food, dine-in and take-out meals. Poor diet coupled with lack of exercise contributes to an increased risk of diseases.

A modification in your eating habit is needed to most especially when you are at risk of disease. Small and simple changes like adding more fruits to your diet can make a difference in your health. However, some situations may need major changes in one's lifestyle. Some of the strategies in changing eating habit includes making a plan and sticking to it.

Eating habit can be modified according to the nutritional recommendations for Filipinos by the Food Nutrition Research Institute (FNRI). Bearing in mind these recommendations help ensured propped diet especially the changes being experienced as your body matures.

Your eating habit should resolve around these recommendations to become a healthier. Remember, your nutritional needs should not be neglected as you participate in an active recreational activity. More attention on nutritional needs in necessary to energize your body and to help your body to recover as well.

Eating Disorders

Eating disorders are illness that involve crucial disturbances in eating behaviors thought to stem from some environmental pressures. These disorders are characterized by an intense fear of becoming fat, which does not disappear when the person is losing weight in extreme amounts. Take a look at the following eating disorders.

- Anorexia nervosa- an eating disorder characterized by self-imposed starvation to lose and maintain very low body weight due to a false/distorted perception of being fat
- Bulimia nervosa- an eating disorder characterized by a pattern of binge eating and purging in an attempt to lose weight and/or maintaining body weight
- Binge-eating disorder- an eating disorder characterized by uncontrollable episode of eating excessive amount of food within relatively short time

Emotional eating- the consumption of large quantities of food to suppress negative emotions

Here are some tips in developing healthful eating habits:

1. Eat slowly. When you get had taken the right amount of food, it gives you the feeling of being full and helps you to eat less.
2. Eating a lot of fruits and vegetables.
3. Start your meal with a broth-base soup to help you feel fuller.
4. Make use of smaller plates to moderate the portion of your foods.
5. Drink at least 8 glasses of non-caloric beverage every day. This helps you feel full and allows you to eat less.
6. Avoid over eating by having smaller packages of snacks.
7. Avoid automatic eating

Sample Meal Plan (Meal varies depends on program)

Day 1	Breakdown of meal/ number of servings
Breakfast	1 cup rice, pork chop, broccoli
AM Snack (if applicable)	1 cup of coffee
Lunch	1 cup rice, tomato with egg
PM Snack (if applicable)	1 slice bread, 1 cup of coffee
Dinner	1 apple medium
Snack (if applicable)	none
Specific cravings (if applicable)	

Calorie Counter Table

Average Serving	Calorie Count	Average Serving	Calorie Count
Bread and Cereals		Vegetables	
White Bread (1 slice)	65	Beet (1cup)	70
Whole white bread (1 slice)	55	Broccoli (1cup)	45
Doughnut (1 pc)	135	Carrots (1cup)	45
Macaroni w/ cheese (1cup)	475	Peas (1cup)	65
Rice (1 cup)	200	Potatoes, mashed (1cup)	110
		Spinach (1cup)	45
Beverage		Sweet potato, baked	155

Tomato, canned (1cup)	95	= T- Tablespoon)	

What's More

Activity 1: Arrange the jumbled letters to form the word then find it in the word hunt. After you locate the word in the word hunt, use them in a sentence. Good luck!

1. SEOEB- _____
2. UBALIMI RENOVAS- _____
3. BEING TEAGIN- _____
4. RANAEXIO SERVONA- _____
5. ROVE THIWEG- _____
6. TEANIG BHAIT _____
7. FILETYLES- _____
8. EDITING- _____
9. SEADISE- _____
10. NOLTIRATIUN ALTHEH- _____

Activity 2: Now that you arranged the jumbled letter, I wan you now to hunt them in the box.

You're doing Great!

Activity 3: Sentence construction: Finally, use now the following words in a sentence. Use the space provided for you.

1. _____

2. _____

3. _____

4. _____

5. _____

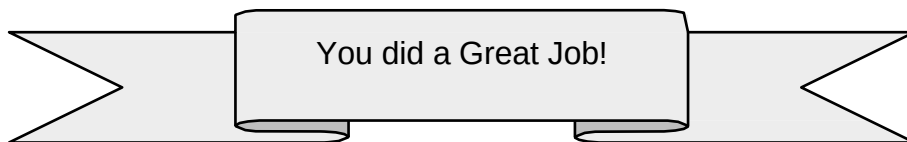

6. _____

7. _____

8. _____

9. _____

10. _____

What I Have Learned

Activity 4: Acrostic Poem

This time you're going to write a poem expressing your understanding from the lesson. Use words or phrases that you will remember from the topic. The first word in each line of your poem should start with the letters of the topic word.

E- _____
A- _____
T- _____
I- _____
N- _____
G- _____

H- _____
A- _____
B- _____
I- _____
T- _____

What I Can Do

You have a lot of friends out there who is waiting for your help. You make a **one-month meal plan** for them. Your meal plan will be of great help for them to reduce their weight. You write your meal plan in a short bond paper and pass to your teacher.

5:

Rubrics:

	5	10	15	20
Menu Plan	Menu looks unprofessional and does not coincide with customer base, needs, or food served	Menu layout looks professional but fails to coincide with customer base, needs, or food served	Menu layout looks professional and coincides with customer base and type of food served but does not address needs of the customer base	Menu layout looks professional and coincides with customer base, their needs, and the type of foods served
Types of Menus	There is no evidence of a specific menu plan or type of menu pricing used	Either fixed, cycle, or type of menu pricing is lacking	Fixed or cycle menu used Prices are inaccurate but type of menu pricing is obvious	Fixed or cycle menu used or mixture of both used Accurate prices and type of menu pricing obvious

Reflection

1. While having the activities, I realize that _____

2. Based from my realization, I am planning _____

3. At the end of the school year I will be more _____

Assessment

A. True or False:

Write TRUE if the statement is correct and FALSE if the statement is not correct.

- _____1. To have a healthy lifestyle, you need to exercise and practice automatic eating.
- _____2. It's a good practice if you eat too much and have exercise once a week.
- _____3. Drinking more than 8 glasses of water a day will just add more over to your weight.
- _____4. Knowing the different eating disorders is much important in making meal plan?
- _____5. It is important to know the calorie content of the food we eat if we want to have a balance diet.
- _____6. Eating too much fruits will make you over weight.
- _____7. The best advise for an underweight individual is to let them have sedentary lifestyle.
- _____8. Eating same food of the celebrity you admire is a good practice to have healthy living.
- _____9. Active lifestyle will depend on the food content that we eat.
- _____10. A child can practice over eating anyway they are still child.

B. Multiple Choice:

Read and analyze carefully the statements and choose the correct answer by encircling the letter. Avoid erasures.

1. If an individual consumes of large quantities of food due to stress, it is called as _____.
 - a. Binge-eating
 - b. Emotional eating
 - c. Stress in eating
 - d. Anorexia
2. One of your friends wants to gain weight because he is under weight, what would be the best advise you can give him?
 - a. Add more carbohydrates to your diet
 - b. Eat more fats and protein
 - c. Have a balance diet and exercise
 - d. Practice automatic eating

3. Your MAPEH teacher told you to reduce your weight because it appears in your BMI that you are OBESE, what will be the best way that you should do?
 - a. Eat breakfast and light dinner
 - b. Skip your breakfast but eat heavy dinner
 - c. Eat breakfast but skip your lunch so that you can eat more at night.
 - d. You skip your breakfast and lunch but eat more during dinner.
4. Your friend is overweight and he want to start his weight loss program. What strategies and advice will you give him?
 - a. Avoid automatic eating while watching the television, reading or studying.
 - b. Try “junior size” instead of “super-size”, use smaller plates, bowls, cups, or glasses.
 - c. Incorporate easy and enjoyable exercises into the program to be motivated.
 - d. All of the above
5. People who lead sedentary lifestyles are often referred to as
 - a. couch potatoes
 - b. athletes
 - c. physically fit
 - d. low-health- risk people

Additional Activities

For this time, you’re going to measure your BMI base from the formula you have learned in the previous PE lesson. With the result, I want you to create your one-day menu which observe the estimated amount of food recommended for you. Example: 3 cups of rice, 1 medium apple, etc.

Days	Breakdown of Meals
Breakfast	
Snack	
Lunch	
Snack	
Dinner	

Answer the following question based on the menu you created.

1. What did you consider most in making your menu? Why?

2. Do you think your food intake is sufficient to sustain your daily energy needs? Explain your answer.
