Organization and Management

Quarter 1- Module 1

Meaning, Functions, Types and Theories of Management

Introductory Message

For the facilitator:

Welcome to the Alternative Delivery Mode (ADM) Module on Organization and Management- Meaning, Function, Types and Theories of Management!

This module was collaboratively designed, developed and reviewed by educators both from public and private institutions to assist you, the teacher or facilitator in helping the learners meet the standards set by the K to 12 Curriculum while overcoming their personal, social, and economic constraints in schooling.

This learning resource hopes to engage the learners into guided and independent learning activities at their own pace and time. Furthermore, this also aims to help learners acquire the needed 21st century skills while taking into consideration their needs and circumstances.

In addition to the material in the main text, you will also see this box in the body of the module:

Notes to the Teacher

This contains helpful tips or strategies that will help you in guiding the learners.

As a facilitator you are expected to orient the learners on how to use this module. You also need to keep track of the learners' progress while allowing them to manage their own learning. Furthermore, you are expected to encourage and assist the learners as they do the tasks included in the module.

For the learner:

Welcome to the Alternative Delivery Mode (ADM) Module on Organization and Management- Meaning, Function, Types and Theories of Management!

The hand is one of the most symbolized part of the human body. It is often used to depict skill, action and purpose. Through our hands we may learn, create and accomplish. Hence, the hand in this learning resource signifies that you as a learner is capable and empowered to successfully achieve the relevant competencies and skills at your own pace and time. Your academic success lies in your own hands!

This module was designed to provide you with fun and meaningful opportunities for guided and independent learning at your own pace and time. You will be enabled to process the contents of the learning resource while being an active learner.

This module has the following parts and corresponding icons:

What I Need to Know

This will give you an idea of the skills or competencies you are expected to learn in the module.

What I Know

This part includes an activity that aims to check what you already know about the lesson to take. If you get all the answers correct (100%), you may decide to skip this module.

What's In

This is a brief drill or review to help you link the current lesson with the previous one.

What's New

In this portion, the new lesson will be introduced to you in various ways such as a story, a song, a poem, a problem opener, an activity or a situation.

What is It

This section provides a brief discussion of the lesson. This aims to help you discover and understand new concepts and skills.

What's More

This comprises activities for independent practice to solidify your understanding and skills of the topic. You may check the answers to the exercises using the Answer Key at the end of the module.

What I Have Learned

This includes questions or blank sentence/paragraph to be filled in to process what you learned from the lesson.

What I Can Do

This section provides an activity which will help you transfer your new knowledge or skill into real life situations or concerns.

Assessment

This is a task which aims to evaluate your level of mastery in achieving the learning competency.

Additional Activities

In this portion, another activity will be given to you to enrich your knowledge or skill of the lesson learned. This also tends retention of learned concepts.

Answer Key

This contains answers to all activities in the module.

At the end of this module you will also find:

References

This is a list of all sources used in developing this module.

The following are some reminders in using this module:

1. Use the module with care. Do not put unnecessary mark/s on any part of the module. Use a separate sheet of paper in answering the exercises.
2. Don't forget to answer *What I Know* before moving on to the other activities included in the module.
3. Read the instruction carefully before doing each task.
4. Observe honesty and integrity in doing the tasks and checking your answers.
5. Finish the task at hand before proceeding to the next.
6. Return this module to your teacher/facilitator once you are through with it.

If you encounter any difficulty in answering the tasks in this module, do not hesitate to consult your teacher or facilitator. Always bear in mind that you are not alone.

We hope that through this material, you will experience meaningful learning and gain deep understanding of the relevant competencies. You can do it!

What I Need to Know

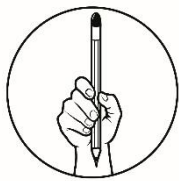

This module was designed and written with you in mind. It is here to help you to define management and determine its functions as well as identify its different types and theories. The scope of this module permits it to be used in many different learning situations. The language used recognizes the diverse vocabulary level of students. The lessons are arranged to follow the standard sequence of the course. But the order in which you read them can be changed to correspond with the textbook you are now using.

The module has only one learning outcome:

Learning Objective 1 – Explain the meaning, functions, types and theories of management (TLE_IAEI7/8OS0i-2)

After going through this module, you are expected to:

- 1.1 define management;
- 1.2 determine the different functions of management; and
- 1.3 identify types and theories of management;

What I Know

Beforehand, take the pre-test below so that we can identify your prior knowledge related to organization and management.

Pretest

Directions: Choose the letter of the correct answer. Write the answer in your activity notebook.

1. Who is known as the Father of Scientific Management?
A. Chester Barnard
B. Frederick W. Taylor
C. Joseph M. Juran
D. Max Weber
2. It is the process of designing tasks, grouping tasks into manageable units, and establishing patterns of authority among jobs and groups of jobs.
A. Controlling
B. Leading
C. Organizing
D. Planning
3. Which of the following is a comprehensive and clear statement that serves as a “mirror” of what the organization will be in the future?
A. Goals
B. Mission
C. Objectives
D. Vision
4. It is the process of determining what the organization desired in the future and deciding how best to get there.
A. Controlling
B. Leading
C. Organizing
D. Planning
5. This type of plan is much broader in scope and determines the long-term objectives of an organization.
A. Contingency plan
B. Directional plan
C. Standing plan
D. Strategic plan
6. Who believed that management is an activity that all organization must practice and viewed as separate from all other organizational activities?
A. Henri Fayol
B. Hugo Munsterberg
C. Mary Parker Follett
D. Max Weber
7. What type of management involves creating objectives, analyzing both internal and external environment, assess strategies to ensure that strategies are applied in the organization?
A. Human Resource Management
B. Risk Management
C. Sales management
D. Strategic management

8. What type of organizational structure being referred to a collection of independent, usually single function organizations that work together in order to produce a product or service?
- A. Horizontal structure
 - B. Network structure
 - C. Parallel structure
 - D. Vertical structure
9. This management theory makes use of the step-by-step process or the scientific method for doing tasks?
- A. General Administrative Theory
 - B. Organizational Behavior
 - C. Scientific Management Theory
 - D. Total Quality Management
10. What do you call the process of departmentalization or segmentation of activities on the basis of similarity?
- A. Differentiation
 - B. Integration
 - C. Organization
 - D. Subordination
11. It is the process of motivating the members of the organization to perform their best towards the attainment of the organization's goals?
- A. Controlling
 - B. Leading
 - C. Organizing
 - D. Planning
12. What does S.M.A.R.T stand for?
- A. specific, manageable, attainable, relevant, timeliness
 - B. specific, measurable, achievable, realistic, time-bound
 - C. simple, measurable, attainable, relevant, transformative
 - D. simple, manageable, achievable, realistic, transactional
13. This type of plan deals with situations that might crop up if assumptions turn out to be wrong.
- A. Contingency plan
 - B. Long-term plan
 - C. Short-term plan
 - D. Strategic plan
14. Which of the following is NOT a typical control process?
- A. Taking actions
 - B. Establishing standards
 - C. Determining the organization's goals and performance
 - D. Measuring and Reporting actual performance and comparing it with Standards.
15. The following are characteristics of management, **EXCEPT**:
- A. Management is tangible
 - B. Management is universal
 - C. Management is purposeful
 - D. Management is goal-oriented

Lesson 1

Basic Concepts and Theories of Management

What's In

Activity: *Agree or disagree!*

Directions: Put check (/) in the opposite column if the statement has relevance to management, if not, put (X). Copy and write your answer in your activity notebook.

STATEMENTS	(/) or (X)
1. Giving of rewards to employees for a job well-done	
2. Establish groups or teams to perform various tasks	
3. Develop organizational vision, mission, goals and objectives	
4. Conduct training to improve skills	
5. Studying the lessons to pass the examinations	
6. Delegate tasks to small units	
7. Allocate budget for possible expenditures	
8. Develop policies, guidelines and standards	
9. Create organizational chart to determine line of authority	
10. Accept donations and sponsorships for personal use	
11. Monitor work performance of employees	
12. Supervise the functions of smaller units	
13. Empowering the members to work independently	
14. Communicate the feedback from customers to the members	
15. Spend organization's budget to unrequired expenditures	

What's New

Activity 1: Match me with the right one!

Directions: Match the statements in column A with the correct word in column B.
Write the letter of the correct answer in your activity notebook.

A	B
1. It is defined as the process of coordinating and bringing all the necessary organizational resources to achieve the desired aims and goals set by the organization	A. Public Relation
2. It refers to the process of achieving unity of effort among the various departments.	B. Authority rights
3. It entails influencing or motivating subordinates to do their best so that they would be able to help the organization's endeavor to achieved their goals.	C. Scientific Management Theory
4. It refers to the legitimate rights of individuals appointed in positions like president, vice president, and manager	D. General Administrative Theory
5. This theory focuses on the functions of manager towards good management practice or implementation	E. Planning
6. It is the process of determining what the organization desired in the future and deciding how best to get there	F. Leading
7. It is a management philosophy that concentrates on the satisfaction of customers in their needs and expectations	G. Objectives
8. This management theory makes use of the step-by-step process or the scientific method for doing tasks.	H. Integration
9. It refers to short-term or medium-term goals that an organization desired to accomplish.	I. Management
10. Managing communications between an organization and the public.	J. Total Quality Management

What is it!

Management Defined

Management is the art of getting things done through others. It is defined as the process of coordinating and bringing all the necessary organizational resources to achieve the desired aims and goals set by the organization. These basic organizational resources include human (personnel), financial (money), physical (material) and information resources. **Manager**, a person performing managerial roles, has to engage four basic functions namely: *planning*, *organizing*, *leading*, and *controlling* in order to accomplish efficiently and effectively the various management tasks and to attain the set organizational goals.

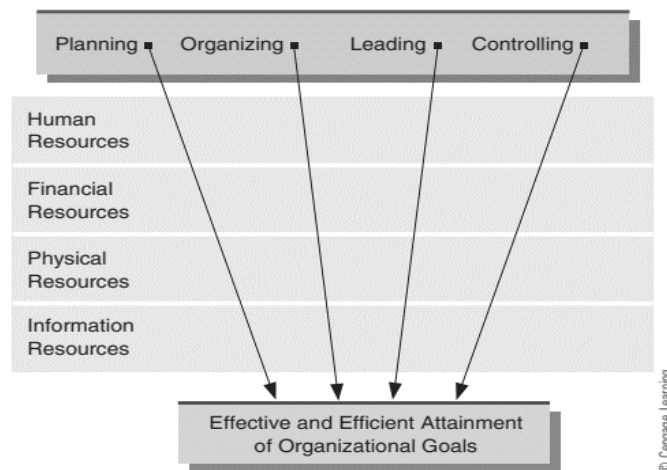

Figure 1. Four Basic Managerial Functions

Characteristics of Management

- Management is universal
- Management is dynamic
- Management is a group of managers
- Management is purposeful
- Management is goal oriented
- Management is integrative function
- Management is a social process
- Management is a multi-faceted discipline
- Management is a continuous process
- Management is a system of authority
- Management is a resource
- Management is intangible

- Management is profession, an art as well as a science.

Management Functions

To dig much deeper understanding on management, one has to know the four major managerial duties, these include the following: planning, organizing, leading and controlling.

A. Planning

Planning involves determining the organization's goals or performance objectives, defining strategic actions that must be done to accomplish them, and developing coordination and integration of activities. It is the process of determining what the organization desired in the future and deciding how best to get there. The planning process usually includes: studying and analyzing the environment, deciding appropriate goals, outlining viable strategies to achieve those goals and developing tactics to help execute the strategies.

Successful planning involves framing the organizational vision, mission, goals and objectives.

Vision is a comprehensive and clear statement that serves as a “mirror” of what the organization will be in the future. It is like a “guiding star” that provides direction to the organization in all its activities. It denotes what the organization is trying to achieve in the future.

Mission statement embodies the soul of the organization. It intends to provide motivation and general direction of an organization. Also, it denotes the image of the organization, character and attitudes that provides guidance to people's actions towards the organization.

Goals are strategic objectives which the management organization has established to outline expected results and guides employee's efforts. It defines the organization's reason for existence and assist growth and organizational performance. Goals must be SMART (specific, measurable, achievable, realistic and time-bound) and it should be aligned with the organizations' overall targets. There are two types of goals: official and operative. Official goals refer to what the organization aims to achieve while operative goals are goals that are required to achieve a desired outcome.

Organizational *objectives* refer to short-term or medium-term goals that an organization desired to accomplish. Objectives contributes significantly in policy development and allocation of organizational resources. Once specific objectives are met, it helps the organization achieve the set strategic goals.

Types of Plans

1. *Strategic plans*- determine the long-term objectives of an organization. This type of plan is much broader in scope and establishes the organization's overall goals. It is the responsibility of the top-management which includes the Chief Executive Officer (CEO), President, and general manager of the company.

2. *Operational plans*- are plans that can be applied to a particular unit area only; their scope is narrow. If operational plans are not clear, company goals may not be achieved.

3. *Long-term plans* – are plans that go beyond three-years. This type of plans attempts to permanently solve problems and eventually achieve the desired overall organizational targets.

4. *Short-term plans*- are plans that cover one year or less. Such plans must lead toward the attainment of long-term goals and are the responsibility of the unit and, or department heads

5. *Directional plans*- are plans that are flexible and give general guidelines only. Although flexible and general, these plans must be aligned with the strategic plans.

6. *Specific plans*- are plans that are clearly stated and which have no room for interpretation.

7. *Single-use plans*- are plans used or stated once only as this applies to the entire organization.

8. *Standing plans*- plans that are ongoing. It provides guidance for different activities done repeatedly.

9. *Contingency plans*- are plans that deals with situations that might crop up if assumptions turn out to be wrong. This type of plans allows management to act immediately to some unforeseen events wherein existing plans are inoperable or unsuitable.

B. Organizing

Organizing is the process of designing tasks, grouping tasks into manageable units, and establishing patterns of authority among jobs and groups of jobs. In other words, organizing involves arranging and structuring work to achieve the goals of the organization. In the process of organizing, the manager differentiates and integrates the activities in the organization. ***Differentiation*** refers to the process of departmentalization or segmentation of activities on the basis of similarity. On the other hand, ***integration*** refers to the process of achieving unity of effort among the various departments.

The process of organizing involves:

1. Establishing enterprise objectives
2. Formulating supporting objectives, policies and plans
3. Identifying and classifying the necessary to accomplish
4. Grouping the activities in the light of human and material resources available.
5. Delegating to the head of each group the necessary activities to perform
6. Tying the groups together horizontally and vertically through authority

relationships and information flows.

Types of Organizational Structure

1. Vertical structure- clears out issues related to authority rights, responsibilities, and reporting relationships. Authority rights refer to the legitimate rights of individuals appointed in positions like president, vice president, and manager to give orders to their subordinates, who in turn, report to them what they have done.

2. Horizontal structure- refers to the departmentalization of an organization into smaller work units as tasks become increasingly varied and numerous.

3. Network structure- is a collection of independent, usually single function organizations that work together in order to produce a product or service. Such network organization are capable of doing their own specialized activities independently such as distributing, producing, designing, etc. but are capable of working effectively at the same time with other network members.

Seven (7) Principles of Organizing

1. Principle of Purpose Determination and Integration
2. Principles of Specialization and Work Division
3. Principle of Leadership
4. Principle of Span of Control or Supervision
5. Principle of Authority and Responsibility
6. Principle of Delegation of Authority
7. Principle of Centralization and Decentralization

C. Leading

Leading is the process of motivating the members of the organization to perform their best towards the attainment of the organization's goals. It also entails influencing or motivating subordinates to do their best so that they would be able to help the organization's endeavor to achieve their goals.

Successful leading in the organization must start with a focus on the psychological capital of the employer, leader, employee and subordinate. Prioritizing what is due to the people rather than looking into their faults can prevent mental and behavioral problems which are considered barriers in the attainment of both organizational and individual goals.

There are three major components of leading (1) motivating employees, (2) managing group dynamics, and (3) the actual process of leadership itself. Managers in big or small companies, Presidents and CEOs must understand the significance of leading. Effective leading in an organization ensures productivity of the employees in the performance of the various organizational activities.

D. Controlling

Controlling is the process of monitoring and correcting the actions of the organization and its members to keep them directed toward their goals. It involves evaluating and correcting the performance of individuals or work groups or teams to ensure that they are all working toward the set goals and plans of the organization.

The typical control process involves establishing standards, measuring and reporting actual performance, and comparing it with standards, and taking actions.

Establishing standards. This means setting criteria for performance. Managers must identify priority activities that have to be controlled, followed by determining how these activities must be properly sequenced. This can be done through development of key performance standards that need to be achieved.

Measuring and Reporting actual performance and comparing it with standards. Technically, this means monitoring of performance. Managers must develop appropriate information systems which will help them identify, collect, organize and disseminate information.

Taking actions. This involves the corrections of deviations from set standards. Managers may rectify deviations by modifying their plans or goals, by improving the training of employees, by firing inefficient subordinates or by adapting effective leadership techniques.

Types of Management

The following are the common types of management:

Strategic management focuses on the management of organizational resources to attain organizational goals and objectives. It involves creating objectives, analyzing both internal and external environment, assess strategies to ensure that strategies are applied in the organization.

Sales Management refers to management of sales programs including recruitment, training, and evaluating the members of the sales personnel.

Marketing Management is the management of marketing strategies, products, brands and promotions.

Public Relations involves managing communications between an organization and the public.

Operations Management refers to the management of production of goods and services. Operations management is a broad field that describes everything from manufacturing management to retail management.

Procurement Management engages in the managing on the acquisition of goods and services from external sources.

Financial & Accounting Management involves managing financial and accounting processes and teams.

Human Resources Management is responsible for attracting, hiring, training, compensating, rewarding and managing the performance of employees. Human resources places a key role in forming and overseeing an organization's culture.

Information Technology Management manages information technology, teams and processes.

Research and Development Management is responsible in the management of research & development processes and teams.

Project Management performs the planning, organizing and controlling of projects.

Risk Management is the discipline of identifying, assessing and controlling the chance that objectives and processes will have negative consequences.

Quality Management pertains to the management of quality planning, control, assurance and improvement.

Design Management refers to the management of design processes such as new product design.

Facility Management is the management of facilities such as offices and data centers.

Knowledge Management enables the identification, creation, representation, distribution and use of knowledge.

Management Theories

Studying management theories will help you understand contemporary management practices. These management theories are the foundation of today's approaches to management. These includes the following:

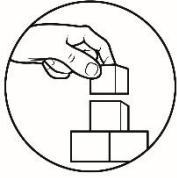

Scientific Management Theory. Proposed by Frederick W. Taylor (1856-1915) who is known as the Father of Scientific Management. This management theory makes use of the step-by-step process or the scientific method for doing tasks. Taylor's Scientific Management Principles (Robbins and Coulter, 2009) are as follows:

1. develop a science for each element of an individual's work to replace the old rule of thumb method;
2. scientifically select and then train, teach, and develop the workers
3. heartily cooperate with the workers so as to ensure that all works are done in accordance with the principles of the science that has been developed; and
4. divide work and responsibility almost equally between management and workers.

General Administrative Theory. This theory focuses on the functions of manager towards good management practice or implementation. Henri Fayol (1841-1925) and Max Weber (1864-1920) are the proponents of this theory. Henri Fayol developed the 14 Management principles. He believed that management is an activity and viewed as separate from all other organizational activities. On the other hand, Max Weber is known for his bureaucratic form of organization which is distinguished by the following components: *division of labor, hierarchical identification of job positions, detailed rules and regulations and impersonal connections with one another.*

Total Quality Management (TQM). Total Quality Management is a management philosophy that concentrates on the satisfaction of customers in their needs and expectations. This customer-oriented mindset has been introduced in 1950s by quality experts, W. Edwards Deming (1900-1993) and Joseph M. Juran (1904-2008). However, the concept gained less popularity. Deming had conceptualized 14 points for Top Management while Juran developed the Fitness of Quality and Quality Planning Roadmap.

Organizational Behavior (OB) Approach. The Organizational Approach involves the study of the conduct, demeanor, or action of people at work. Researches on behaviors help the manager to successfully carry out the different functions- leading, team building, resolving conflict and others. Robert Owen, Mary Parker Follett, Hugo Muntzberg, and Chester Barnard were the early supporters of the OB Approach.

What's More

Activity 1. Find me in the Box

Directions: Fill in the blanks with the correct word being described in the statements. Choose the correct word/s inside the box. Write the answers in your activity notebook.

structuring	bureaucratic	analyzing
Knowledge management	leading	Henri Fayol
Edward Deming	Specific plans	Controlling
Organizational Approach		

- _____ enables the identification, creation, representation, distribution and use of knowledge.
- _____ is the process of monitoring and correcting the actions of the organization and its members to keep them directed toward their goals.
- Max Weber is known for his _____ form of organization.
- The _____ involves the study of the conduct, demeanor, or action of people at work.
- Organizing involves arranging and _____ work to achieve the goals of the organization
- The planning process includes studying and _____ the environment.
- _____ developed 14 Management Principles.
- _____ conceptualized 14 points for top management.
- _____ are plans that are clearly stated and which have no room for interpretation.
- Successful _____ in the organization must start with a focus on the psychological capital of the employer, leader, employee and subordinate.

Activity 2. Can you still remember?

Directions: Enumerate the following. Write your answer in your activity notebook.

- 1-10. Characteristics of Management
- 11-14. Basic Functions of Management
- 15-18. Theories of Management
- 19-20. Quality experts

What I Have Learned

Activity 1. *Explain to me briefly!*

Directions: Discuss the following briefly. Write the answers in your activity notebook.

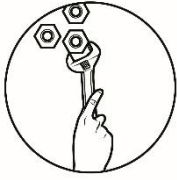

1. What is Management?

2. Discuss the four basic Management Functions.

3. Enumerate and discuss Management Theories.

4. Explain the three (3) typical control process in the organization?

5. Differentiate organizational vision, mission, goals and objectives.

What I Can Do

Activity 1: *Make it happen!*

Directions: Complete the table below.

Suppose you are elected as the SSG President in your school. Your SSG Adviser asked you to develop plans and programs for the activities within the school year. How are you going to mapped out activities and plans? Use the format below.

Objectives	Activities	Time Frame	Resources Needed	Person's Involved

Activity 2. *Create your own version!*

Directions. Furnish a copy of the Department of Education's Vision, Mission, Goals and Objectives. Using the DepEd's VMGO as your guide, develop your own with the assumption that you are the head of agency or the CEO of your chosen company. Follow the format below.

Vision:

Mission:

Goals:

Objectives:

Assessment

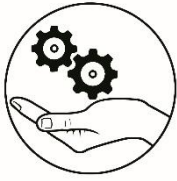

Let's evaluate your learning during the session of the module simply by answering the post-test below.

POST-TEST

Directions: Answer the following question below and write the letter of the correct answer in your notebook.

1. This type of plan is much broader in scope and determines the long-term objectives of an organization.
A. Contingency plan
B. Directional plan
C. Standing plan
D. Strategic plan
2. It is the process of determining what the organization desired in the future and deciding how best to get there.
A. Controlling
B. Leading
C. Organizing
D. Planning
3. It is the process of motivating the members of the organization to perform their best towards the attainment of the organization's goals?
A. Controlling
B. Leading
C. Organizing
D. Planning
4. Who is known as the Father of Scientific Management?
A. Chester Barnard
B. Frederick W. Taylor
C. Joseph M. Juran
D. Max Weber
5. Which of the following is a comprehensive and clear statement that serves as a "mirror" of what the organization will be in the future?
A. Goals
B. Mission
C. Objectives
D. Vision
6. What type of organizational structure being referred to a collection of independent, usually single function organizations that work together in order to produce a product or service?
A. Horizontal structure
B. Network structure
C. Parallel structure
D. Vertical structure
7. It is the process of designing tasks, grouping tasks into manageable units, and establishing patterns of authority among jobs and groups of jobs.
A. Controlling
B. Leading
C. Organizing
D. Planning

8. Who believed that management is an activity that all organization must practice and viewed as separate from all other organizational activities?
- | | |
|---------------------|------------------------|
| A. Henri Fayol | C. Mary Parker Follett |
| B. Hugo Munsterberg | D. Max Weber |
9. What type of management involves creating objectives, analyzing both internal and external environment, assess strategies to ensure that strategies are applied in the organization?
- | | |
|------------------------------|-------------------------|
| A. Human Resource Management | C. Sales management |
| B. Risk Management | D. Strategic management |
10. This management theory makes use of the step-by-step process or the scientific method for doing tasks?
- | | |
|----------------------------------|---------------------------------|
| A. General Administrative Theory | C. Scientific Management Theory |
| B. Organizational Behavior | D. Total Quality Management |
11. What do you call the process of departmentalization or segmentation of activities on the basis of similarity?
- | | |
|--------------------|------------------|
| A. Differentiation | C. Organization |
| B. Integration | D. Subordination |
12. The following are characteristics of management, **EXCEPT**:
- A. Management is tangible
 - B. Management is universal
 - C. Management is purposeful
 - D. Management is goal-oriented
13. Which of the following is NOT a typical control process?
- A. Taking actions
 - B. Establishing standards
 - C. Determining the organization's goals and performance
 - D. Measuring and Reporting actual performance and comparing it with Standards.
14. What does the acronym S.M.A.R.T stand for?
- A. specific, manageable, attainable, relevant, timeliness
 - B. specific, measurable, achievable, realistic, time-bound
 - C. simple, measurable, attainable, relevant, transformative
 - D. simple, manageable, achievable, realistic, transactional
15. This type of plan deals with situations that might crop up if assumptions turn out to be wrong.
- | | |
|---------------------|--------------------|
| A. Contingency plan | C. Short-term plan |
| B. Long-term plan | D. Strategic plan |

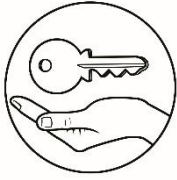

Additional Activities

Activity. Modified True or False

Directions: Write TRUE if the statement is correct, if false, change the underlined word to make the statement correct. Write your answer in your activity notebook.

1. Leading involves arranging and structuring work to achieve the goals of the organization
2. Management is getting things done through others.
3. Goals are strategic plans which the management organization has established to outline expected results and guides employee's efforts.
4. Taking actions means setting criteria for performance.
5. Supervisors are the person performing managerial roles.
6. The basic organizational resources are human, financial, physical, and information.
7. Operational plans are plans that can be applied to a particular unit area only; their scope is narrow
8. Vertical structure refers to the departmentalization of an organization into smaller work units as tasks become increasingly varied and numerous.
9. Total Quality Management is a management philosophy that concentrates on the dissatisfaction of customers in their needs and expectations.
10. Short-term plans are plans that cover five years or less
