MULTIPLICATION OF 5- OR MORE DIGIT FACTORS HAVING 1 TO 3 ZEROS IN BOTH FACTORS WITHOUT REGROUPING

Department of Education
BUREAU OF ELEMENTARY EDUCATION
2nd Floor Bonifacio Building
DepEd Complex, Meralco Avenue
Pasig City

Revised 2010

by the Learning Resource Management and Development System (LRMDS),
DepEd - Division of Negros Occidental
under the Strengthening the Implementation of Basic Education
in Selected Provinces in the Visayas (STRIVE).

Section 9 of Presidential Decree No. 49 provides:

“No copyright shall subsist in any work of the Government of the Republic of the Philippines. However, prior approval of the government agency or office wherein the work is created shall be necessary for exploitation of such work for profit.”

This material was originally produced by the Bureau of Elementary Education of the Department of Education, Republic of the Philippines.

This edition has been revised with permission for online distribution through the Learning Resource Management Development System (LRMDS) Portal (<http://lrmds.deped.gov.ph/>) under Project STRIVE for BESRA, a project supported by AusAID.

MULTIPLICATION OF 5-OR MORE DIGIT FACTORS HAVING 1 TO 3 ZEROS IN BOTH FACTORS WITHOUT REGROUPING

Objectives: Multiply 5-or more digit factors having 1 to 3 zeros in both factors without regrouping.

A. Review your multiplication facts.

Do you still remember the principle that any number multiplied by zero the product is zero? Well, try these as fast as you can.

$$\begin{array}{r} 1) \quad 45 \\ \times 0 \\ \hline \end{array}$$

$$\begin{array}{r} 2) \quad 678 \\ \times 0 \\ \hline \end{array}$$

$$\begin{array}{r} 3) \quad 454 \\ \times 0 \\ \hline \end{array}$$

$$\begin{array}{r} 4) \quad 5\,431 \\ \times 0 \\ \hline \end{array}$$

$$\begin{array}{r} 5) \quad 61\,587 \\ \times 0 \\ \hline \end{array}$$

B. Answer the following in your notebook.

$$\begin{array}{r} 1) \quad 213 \\ \times 3 \\ \hline \end{array}$$

$$\begin{array}{r} 2) \quad 842 \\ \times 2 \\ \hline \end{array}$$

$$\begin{array}{r} 3) \quad 524 \\ \times 3 \\ \hline \end{array}$$

Check your answer using the key to correction. If your score is 6 or 8, you can now proceed to this module. If you get 5 correct answers or below, review first the past lessons.

Study and Learn

A. Read the problem

A gasoline attendant sold an average of 1 200 litres of gasoline a day. How many liters of gasoline were sold in 24 days?

What is asked?

The number of litres of gasoline sold in 24 days.

What are the given facts?

*1 200 - the average number of litres of gasoline sold each day
24 - the number of days*

What process should you use to solve the problem?

Multiplication

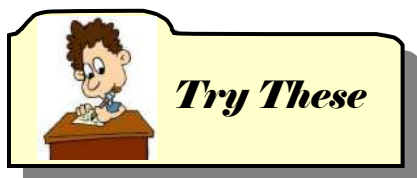

What is the number sentence?

$$1\,200 \times 24 = n$$

The number sentence can also be written this way.

$$\begin{array}{r} 1\,200 \\ \times \quad 24 \\ \hline 4800 \text{ - multiply by 4} \\ 2400 \text{ - multiply by 2} \\ \hline 28800 \end{array}$$

Try These

Do the following exercises on your notebook.

A. Multiply

a)
$$\begin{array}{r} 42\ 000 \\ \times \quad 30 \\ \hline \end{array}$$

b)
$$\begin{array}{r} 60\ 031 \\ \times \quad 200 \\ \hline \end{array}$$

c)
$$\begin{array}{r} 52\ 002 \\ \times \quad 100 \\ \hline \end{array}$$

d)
$$\begin{array}{r} 30\ 052 \\ \times \quad 100 \\ \hline \end{array}$$

e)
$$\begin{array}{r} 40\ 024 \\ \times \quad 200 \\ \hline \end{array}$$

B. Answer the following

1. Multiply 8 400 and 200. What is the product?
2. If the factors are 2 100 and 42, what is the product?
3. What is 4 200 times 400?
4. What is the correct product of 13 030 multiplied by 300?
5. An Agricultural supply dealer has an average sales of ₦ 9 200 a day. How much will he earn in 120 days?

Wrap Up

Any number multiplied by zero equals zero. If the zero on both factors are found in the end, multiply the given number then count the number of zeros found at the end of the factors and affix them to the answer.

On Your Own

A. Find the product. Use your notebook.

$$\begin{array}{r} 1) \quad 30\,002 \\ \times \quad 300 \\ \hline \end{array}$$

$$\begin{array}{r} 2) \quad 42\,102 \\ \times \quad 40 \\ \hline \end{array}$$

$$\begin{array}{r} 3) \quad 60\,002 \\ \times \quad 50 \\ \hline \end{array}$$

$$\begin{array}{r} 4) \quad 32\,102 \\ \times \quad 400 \\ \hline \end{array}$$

$$\begin{array}{r} 5) \quad 52\,303 \\ \times \quad 300 \\ \hline \end{array}$$

B. Do what is asked.

1. What is 64 002 multiplied with 400?
2. If the factors are 5 200 and 40, what is the product?
3. Multiply 9 300 and 200, what is the product?
4. What is 30 002 repeated 30 times?
5. If you multiply 6 200 and 400, what is the product?

Check your answer with the answer key. If you get....

8-10 - *Excellent! You may now proceed to the next lesson.*

7-5 - *You need to review the processes you missed.*

0-4 - *You need to repeat the whole process.
Ask your teacher or elder to help you.*
