HOME ECONOMICS
Cosmetology/Beauty/Nail Care NC II
Quarter 1 - Module 1
Perform Hand Spa

WHAT IS THIS MODULE ABOUT?

This module covers the knowledge, skills and attitude in performing spa for hands. It also involves preparing the client, application of hand spa products and performing post hand spa activities.

WHAT WILL YOU LEARN?

After completing this module, you should be able to:

- a. prepare the client prior to applying hand spa;
- b. apply hand spa correctly; and
- c. perform post hand spa activity.

WHAT DO YOU ALREADY KNOW?

Pre-Test

On the blank provided before the number, draw ☺ if the statement is correct and ☹ if incorrect.

- _____ 1. Wash your hands after every beauty care treatment.
- _____ 2. Massaging does not have a soothing effect on the client.
- _____ 3. Make your client feel important during the consultation.
- _____ 4. Natural ingredients can be used in hand spa due to their healing effect.
- _____ 5. Waste products should be disposed anywhere.

LESSON 1: PREPARE THE CLIENT PRIOR TO APPLYING HAND SPA

WHAT IS THIS LESSON ABOUT?

The lesson deals with the analyzing and checking of the condition of hands and nails, consideration of the necessary activities prior to applying hand spa, observance of safety precautions and setting up spa machine to appropriate temperature.

WHAT WILL YOU LEARN?

At the end of the lesson, you should be able to:

- a. check and analyze the condition of the hands and nails;
- b. ensure patron's safety and comfort prior to hand spa activity;
- c. wash the hand with warm water and soap before and after scrubbing; and
- d. towel-dry and scrub the hand with appropriate lotion.

LET US STUDY!

Spa is a health and fitness facility offered by a salon.

It is a beauty care service where curative mineral is present for personal beautification. If spa is applied to the hands, the patron can experience relaxation, pain is relieved and blood circulation is stimulated due to the warm and enhancing effect of the softening agents. It exfoliates dead skin cells and smoothens roughness, aiding in the penetration of treatment ingredients in the system.

Client care is essential to your success as an operator. Showing concern for your client, satisfactorily meet all her needs.

In every consultation you have to:

- listen to what the client tells you
- find out what the client wants
- ask the client courteously to get useful information
- observe the client carefully and thoroughly during the consultation
- ensure that the client is seated comfortably and securely throughout the consultation

- reassure the client that her belongings are safe
- check and analyze the condition of the client's hands and nails

After taking all these into consideration, you can now prepare yourself and your client for hand spa. Begin by setting the hand spa machine to regulate heat and to melt candle wax. Then, direct your client to hand wash.

Washing hands is one of the most basic ways to minimize the transmission of germs. Insist that you and the client wash hands prior to starting service. A fresh bowl of warm soapy water should be provided to each client for the soaking of hands. After a few minutes, rinse the hands then towel dry before scrubbing with appropriate lotion.

Apply hand spa.

LET US REMEMBER

- Client care is the utmost priority of any salon. Allow time for client consultation before any beauty care service begins.
- ☐ Analysis of the client's hand condition will help you determine the cosmetics and/or service that should or should not be applied.
- ☐ Maintain good personal and general hygiene. Wash your hands regularly and clean implements thoroughly.

HOW MUCH HAVE YOU LEARNED?

Give in sequential order the different processes to hand spa a client. Write your answer in a 1 whole sheet of paper.

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.

LET US APPLY WHAT YOU HAVE LEARNED

Activity No. 1

Make your own Consultation Card format for hand spa treatment.

For your guidance, a consultation card may include personal details, medical history, contra-indications, client's lifestyle, skin type, skin and nail diseases and disorders, treatment record, signature of the client and patron; and etc.

For your source, you may interview an expert and local industry practitioners or you may look from the internet, books and other reading materials (but serves as a guide only).

Write your answer Consultation Card in a short bond paper.

RESOURCES:	paraffin (candle wax)	baby oil
	plastic wrap	avocado fruit
	lemon juice	hand cream
	petroleum jelly	white cotton gloves
	yogurt	exfoliating scrub
	lotion	hand towel

LESSON 2: APPLY HAND SPA

WHAT IS THIS LESSON ABOUT?

This lesson covers the procedure in applying hands spa, identifying and using of tools, supplies and materials properly, applying hands spa, determining appropriate temperature and observing of safety precautions.

WHAT WILL YOU LEARN?

At the end of the lesson, you should be able to:

- a. make a hand spa recipe based on the availability of ingredients;
- b. b. prepare and use the necessary tools, supplies and materials according to Occupational Health and Safety Commission (OHSC) requirements; and
- c. apply hand spa procedure.

LET US STUDY!

Definition of Terms

- **Hand spa** – beauty care service using natural oil, vitamins and minerals having curative effect to the body.
- **Paraffin** – a waxy substance used especially for making candles. It is important to note that the most exposed part of the body to toxins are the hands. They should be well taken care of.

Here are some helpful hand spa recipes you can offer to your clients:

Moisturizing Paraffin Treatment

What you need: 4 cups grated paraffin or white candle wax
1/4 cup olive oil or baby oil
Plastic wrap
Moisturizer/hand cream/lotion

Procedure

1. Melt the oil and wax together in a hand spa machine. Pour the mixture into a container big enough to dip your hands in.
2. Cool the wax mixture until comfortably warm. You may dip a stick in and let a drop fall on your skin to test if the temperature is tolerable.
3. Massage your hands with moisturizer or hand cream.

4. Dip your hands in the mixture. Then wrap each hand with plastic wrap and let it set for 20 minutes.
5. Remove the wrap and peel off the wax.

How it works

The heated wax allows the moisturizer to penetrate deeper into the hands and have a longer lasting moisturizing therapy. Massage causes certain physiological effects, soothe and relax blood vessels and nerve endings. Rapid movements stimulate blood to flow faster and easier.

Avocado and Yogurt Hand Treatment

What you need: ½ of an avocado fruit, mashed
 ½ of a lemon fruit, juiced
 ½ cup of plain yogurt
 petroleum jelly
 long white cotton gloves
 moisturizing bar soap

Procedure

1. Mix the avocado, lemon juice and yogurt together.
2. Lather mixture on hands and leave for 10 to 15 minutes.
3. Rinse off then apply petroleum jelly.
4. Wear long white cotton gloves for one hour.
5. Rinse off with a moisturizing bar soap.

How it works

The citric acid in lemon and the lactic acid in yogurt help fade age spots and the natural oils in avocado which is rich in vitamins A, B and E accelerates healing. Petroleum jelly help moisturizes the hands making them soft and smooth.

Exfoliating Treatment

What you need: Soap
 Sanitizer/ Alcohol
 Cotton balls
 Exfoliating Scrub
 Moisturizer/Lotion
 Hand Towel

Procedure

1. Ask the client to wash her hands using soap and water. Make sure that all dirt on the hand forearm is removed.
2. Dry both hands with towel.
3. Sanitize the client's hands and arms by applying alcohol with cotton ball.
4. Apply exfoliating scrub on the right hand and forearm to remove dead skin cells. Do the same on the left hand and forearm.
5. Rinse off the exfoliating scrub with water.
6. Dry the hands using a towel.
7. Apply lotion and massage the hand and forearm by applying effleurage thumb kneading to the palm of the hand.
8. Repeat the same procedure on the left hand.

How it works

Exfoliating scrub helps remove dry or dead skin cells on the surface of the skin; helps many skin problems; and also increases blood circulation, which helps to achieve healthy and glowing skin.

LET US REMEMBER

- ❖ ☐ Hand massage is a relaxing and worthwhile part of hand spa. Better blood circulation increases the chances of having healthy nails.
- ❖ ☐ Vitamins and minerals in fruits have curative effects to the body especially when properly used.
- ❖ ☐ Hand massage is most beneficial when the strokes are directed to the heart. It can create a feeling of inner well-being.

HOW MUCH HAVE YOU LEARNED?

In not more than 5 sentences, explain why hand spa and hand massage are beneficial to the body. Write your answer in a 1 whole sheet of paper.

LET US APPLY WHAT YOU HAVE LEARNED

Activity No. 2

Make your own Hand Spa Recipe based on the availability of ingredients in your place.

For your guidance, you may look from the internet or other resources.

Write your answer in a short bond paper.

Activity No. 3

Choose a family member and demonstrate hand spa by using the hand spa recipe you have made based on Activity No. 2.

Record your hand spa treatment performance by making a video.

Submit your video with 2 options:

- Send to facebook/messenger account (Maria Sionny Maglantay).
- Send through Bluetooth/Share It application to the teacher assigned to collect the Answer Sheets.

(Note: Attach your name to the video/file you will send.)

In this activity, you are rated according to the following:

CRITERIA	SCORE
Have followed all the steps correctly.	5
Have followed the steps but missed 1	4
Have followed the steps but missed 2	3
Have followed the steps but missed 3	2
Have not shown any step	1

After making the Hand Spa Treatment video presentation, answer the following questions in a short bond paper.

Learning Insights

- a. What insights have you gained from your project?
- b. What significant values have you developed while doing your project?
- c. What difficulties did you encounter and how did you overcome them?

RESOURCES: 4 cups grated paraffin or white candle wax
1/4 cup olive oil or baby oil
plastic wrap
moisturizer/hand cream/lotion
1/2 of an avocado fruit, mashed
1/2 of a lemon fruit, juiced
1/2 cup of plain yogurt
petroleum jelly
long white cotton gloves
moisturizing bar soap
exfoliating scrub
lotion
alcohol
hand towel

LESSON 3: PERFORM POST HAND SPA ACTIVITY

WHAT IS THIS LESSON ABOUT?

The lesson deals with the proper disposal of wastes, sanitation and store of tools and equipment.

WHAT WILL YOU LEARN?

At the end of the lesson, you should be able to:

- a. dispose waste products according to OHSC and DOH requirements;
- b. sanitize and store tools and equipment;
- c. advise the patron on post service maintenance program;
- d. close and sanitize workstation; and
- e. record service outcome.

LET US STUDY!

When carrying out a hand spa it is essential that the client knows how to take care of her hands and nails at home. It is your duty as an operator to ensure that correct aftercare advice is given.

Aftercare advice differs slightly for each client, according to individual needs, but generally, they are as follows:

- ☐ Wear rubber gloves when washing clothes and dishes
- ☐ Wear protective gloves when gardening or doing housework
- ☐ Dry the hands thoroughly after washing and apply hand cream/
moisturizer/ lotion
- ☐ Avoid harsh soaps when washing hands
- ☐ Do not use the fingernails as tools

Keep a record of your client's visits and the services given to her/him for future reference.

The salon should always appear neat, tidy and safe. The waiting area should be clean and well taken care of. The treatment area should be freshly sanitized and operators should clean it as they go.

All non-disposable instruments used in the service must be sterilized and placed inside the cabinet sanitizer. All disposable items should be immediately discarded and new ones are taken out for the next treatment.

Waste products are segregated and disposed of according to OHSC and DOH requirements.

LET US REMEMBER

- ☐ Always sanitize tools and instruments.
- ☐ Dispose wastes materials following environmental rules and regulations.
- ☐ Keep track of your patron's beauty care service record.

HOW MUCH HAVE YOU LEARNED?

In not more than 5 sentences, explain why disposing waste products; sanitizing and storing tools and equipment are important to a salon. Write your answer in 1 whole sheet of paper.

LET US APPLY WHAT YOU HAVE LEARNED

Activity No. 4

Through video recording, perform post hand spa treatment. Submit your video with 2 options:

- Send it online through email or facebook/messenger account.
- Send through Bluetooth/Share It application to the teacher assigned to collect the Answer Sheets.

In this activity, you will be assessed based on the following rubric:

	Excellent (5)	Very Good (4)	Good (3)	Fair (2)	Poor (1)	Total
A. Sanitation Washed products and disposed used material accdg. to OHC and DOH requirement Tools and equipment are sanitized Work station is closed and sanitized for the next treatment activity						
B. Storing of Tool and Equipment Tools and equipment are properly stored						
Total Score						

After making the Post Hand Spa Treatment video presentation, answer the following questions in a short bond paper.

Learning Insights

- What insights have you gained from your project?
- What significant values have you developed while doing your project?
- What difficulties did you encounter and how did you overcome them?
